Guidelines to install eZee NextGen.

Necessary setup files required to start the installation

- ❖ Net Framework2.0 or Higher
- ❖ Windows Installer 3.1
- ❖ CRSetupX86
- ❖ eZee Front Desk Full Setup for windows XP with Service Pack 2 or Windows Vista or Windows 7 or Windows 2003 or Windows Server 2003 and Windows Server 2008
- ❖ eZee Front Desk Full Setup for XP SP 3

Things to keep in mind before starting installation.

- ❖ Check Firewall (disable it momentarily while the installation is going on. You can turn it **ON** once the installation is complete)
- ❖ Check Antivirus (disable it momentarily while the installation is going on. You can turn it **ON** once the installation is complete)
- ❖ Check Windows User (disable it momentarily while the installation is going on. You can turn it **ON** once the installation is complete)s
- ❖ In case of Windows Vista/7 - Check UAC, if it is ON make it OFF

Note: It's not always necessary to disable the firewall, anti-virus for installing ezee. This is a precaution we ask you to take as some antivirus detects the SQL database files and block it as a precaution.

Setup File (128 MB):

The new setup file of eZee NextGen (eZeeFront Desk and eZee POS Burrp) is a complete package of all the software you will need to install and start using eZee on your machine. Once you start the installation from the setup file, it will start installing all the required programs on your machine and skip the ones that you already have. Thus saving your from deciding what to install and what not to. Simply start the installation after following the above mentioned precautions and wait till the setup gives a confirmation of successful installation of the software and the creation of MS SQL database.

Once the installation is complete, you can select **eZee Front Desk Configuration** from the program menu and start configuring your property details in it.

If you need any help with the configuration, you can either refer to our manuals or contact our online chat support executive.
